This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101032239.

Foster energy communities for a fair energy transition in your city

Join the

Sun4All Capacity Building and Knowledge Sharing Programme

Become Sun4All Project Replicator!

Get inspired

The Sun4All project sets up a financial support scheme, which is already successfully running in the United States. The existing New York State initiative (utility bill assistance programme), named "Solar for All", is now adapted to the European context in the framework of the Sun4All project.

Four European cities and regions (Coeur de Savoie (FR), Barcelona (ES), Rome (IT), and Almada (PT)) are acting as early adopters of the Sun4All financial support scheme for renewable energy access.

After testing and evaluating the model in pilot cities and regions, replication and up-scaling of the programme is foreseen in other European cities and regions.

Learn more faster

Sun4All tackles energy poverty and facilitates vulnerable consumers' participation in a fair energy transition in Europe. Sun4All is now offering a Capacity Building and Knowledge Sharing Programme.

Joining the Sun4All Capacity Building and Knowledge Sharing Programme will provide cities and utilities with the opportunity to:

- Learn from the experience of Sun4All pilots and members of the Community of Practice.
- Join inspiring webinars and learn more about tackling energy poverty at the local level.
- Participate in the technical visits to different Sun4All demonstration sites.
- Raise awareness and educate the public using the Sun4All learning materials.
- Plan the integration of Sun4All into your city Sustainable Energy and Climate Action Plan.
- Adapt and replicate the innovative financial scheme tested by the Sun4All project.

Express your interest

? Who can participate?

Local and regional governments, public and private utilities and energy agencies, civil society organisations, social housing associations, energy cooperatives, energy agencies, energy service companies (ESCOs), etc.

? How to participate?

If you want to be informed about the Sun4All Capacity Building and Knowledge Sharing Programme, please fill in the form below or write us an email at info@sunforall.eu. You will receive detailed information about the Programme and its events by email.

Leave us your contact details to be informed about the Programme!
